
**2nd International Symposium on Atomic
Technology for Biomaterials Science**
(2nd ISATBMS-2008)

July, 16 2008, Tsukuba

14:00-14:30

*Takanori Ichiki, Univ. Tokyo, "Biodevice Research
for Cell Therapy"*

14:30-14:45

*Katsuhisa Kitano, Osaka University, "Atmospheric
Pressure Plasma Technique in Bio-related Science"*

14:45-15:15

*Osamu Niwa, AIST, "Sputtered nanocarbon films
for developing electrochemical biosensor"*

15:15-15:30

*Jun Nakanishi, NIMS, "Photo-induced Cell
patterning technology"*

15:30-15:45 Break

15:45-16:00

*Chiaki Yoshikawa, NIMS, "Densely Packed Surface
Polymer Brush"*

16:00-17:00

*Phillip Messersmith, Northwestern Univ., "Mussel
Adhesive Proteins: Mechanochemistry and
Biologically Inspired Polymers"*

17:00-17:30

*Kohei Soga, Tokyo Univ. Sci., "Upconversion
Nanophosphors for NIR Biophotonics"*

17:30-19:30

Party and Poster presentation (Lab.Adv.Res.B112)

Date July 16, 2008

Site, Room Lab.Adv.Res. B0110, University of Tsukuba

Organizer, Tsukuba Research Center for Interdisciplinary Materials

Science (TIMS), University of Tsukuba

Co-organizer, General Management Group, Grant-in-Aid for Scientific

Research on Priority Areas "Lifesurveyor", MEXT

Co-organizer, International Center for Materials Nanoarchtechnics, WPI

Research Center Initiative, MEXT
