

TICMS & IWP Joint Workshop on Conjugated Polymers

(international Conference Room, University of Tsukuba, Sept 5th, 2013)

Program

13:00 – 13:05	Opening (<i>M. Kijima</i>)
13:05 – 13:25	Syntheses of Light Emitting Poly(2,7-carbazole)s <i>Dr. Masashi Kijima, Prof., University of Tsukuba, Japan</i>
13:30 – 13:50	Synthesis of Pyrrole-Based π -Conjugated Polymer by Ru-Catalyzed Site-Selective Direct Arylation Polycondensation <i>Dr. Takaki Kanbara, Prof., University of Tsukuba, Japan</i>
13:55 – 14:15	Chiral Electrochromism Phenomenon of Conducting Polymers Synthesised with Cholesteric Liquid Crystal Electrolyte <i>Dr. Hiromasa Goto, Prof., University of Tsukuba, Japan</i>
14:20 – 14:40	Self-Assembly of π -Conjugated Polymers and Anomalous Photoemission Properties from their Microspheres <i>Dr. Yohei Yamamoto, Prof., University of Tsukuba, Japan</i>
14:40 – 15:00	Coffee Break
15:00 – 15:50	Large N-Heteroacenes: Syntheses and Properties <i>Dr. Uwe H. F. Bunz, Prof., Ruprecht Karl University of Heidelberg, Germany</i>
15:55 – 16:25	Synthesis of Highly Crystalline Conjugated Polymers for Organic Electronics <i>Dr. Itaru Osaka, RIKEN, Japan</i>
16:30 – 17:00	π -Conjugated Amorphous Polymers for Bulk-Heterojunction Photovoltaic Cells <i>Dr. Takeshi Yasuda, National Institute of Materials Science (NIMS), Japan</i>
