

# Excellent Student Poster Award

of

The 4th Tsukuba-Hsinchu Joint Symposium on  
Interdisciplinary Nano-Science and Technology  
(4<sup>th</sup> Tsukuba-Hsinchu SINST)

Poster No.	Name (Affiliation)	Title
P-2	Yuzuru Kobayashi (University of Tsukuba)	Novel Synthesis of Functionalized Tetrahedranes, and Their Structures and Reactivities
P-7	Emi Kano (University of Tsukuba)	Production of Graphene Films by Simple Electrochemical Exfoliation using NaCl Solution
P-11	Risa Sumi (University of Tsukuba)	Electronic structure of twisted bilayer grapheme
P-12	Hikari Tomori (University of Tsukuba)	Strain Engineering of Graphene through a Nanostructured Substrate
P-15	Seira Ikuma (University of Tsukuba)	Synthesis and Spectral Properties of Acridine-based $\pi$ -Conjugated Oligomers
P-22	Kouhei Yonezawa (University of Tsukuba)	Charge generation dynamics in Low-Gap Organic Photovoltaic
P-34	Shenghao Wang (University of Tsukuba)	Study on the Electronic Properties of Bathocuproine/Mg Interface for Organic Solar Cells by Synchrotron Radiation
P-41	Chiu-Chun Tang (National Tsing Hua University)	Characteristics of a sensitive micro-Hall probe fabricated on chemical vapor deposited graphene for temperature range from liquid-helium to room temperature
P-47	Yu-Ting Yen (National Tsing Hua University)	Fabrication of CuIn(S,Se) <sub>2</sub> Nanotip Arrays Solar Cells based on Non-vacuum nanocrystal inks
P-49	Zhan-Hong Lin (National Tsing Hua University)	Enhanced circular dichroism by periodic plasmonic nanostructures
P-50	Fan-Cheng Lin (National Tsing Hua University)	Fano-like resonance on asymmetric stacked nanoantenna
